The Annual General Meeting of HKDA was successfully held on 17 September 2019. It is my pleasure to be re-elected Council Member. With the lead of the President, Dr Century Tsang, the Council will continue to strive for the best interest of the dentistry and the community. We are stepping up efforts to polish and create communication platforms to interact with members and the general public more effectively, like renovating HKDA website and developing HKDA apps. Stay tuned!

In this issue, we have introduced a new FDI World Dental Federation (FDI) Corner for sharing of FDI or FDI-related articles and information for members’ interest. It is only through keeping our mind open and our pace with the fast-changing dental world can we keep our profession dynamic and progressive.

Our signature event, HKIDEAS, is also a good platform to gear up ourselves for future challenges and advancements. I am glad that the HKIDEAS 2019 concluded successfully in early August, with dozens of world-class speakers sharing dentistry development and practice experience and over a hundred of booths displaying renowned dental products and latest technology.

Since HKIDEAS’s launch in 2010, the scale, presentation variety, number of exhibitors and visitors keep growing year by year. I am really happy to be part of the Organizing Committee throughout all these years, making HKIDEAS one of the biggest events among the local dentistry.

In the coming year, I will take a challenging new role, the Chairman of the Organizing Committee. I will try my best to explore ways of improvement and bring new impulses to HKIDEAS 2020. We have just organized the trade dinner of HKIDEAS 2020 on 4 November 2019, where we met up our current and potential exhibitors and strengthened the ties with them.

Hope to see more worldwide exhibitors and dental practitioners come to join us!
