The 8th edition of Hong Kong International Dental Expo And Symposium (HKIDEAS) concluded successfully at Hong Kong Convention and Exhibition Centre in early August.

“Better Tomorrow Through Innovation”, the theme of the HKIDEAS 2019, highlighted the dental advancements the digital dentistry had brought. We had a specialized symposium to take the dental counterparts through the basics of digital dentistry and renowned speakers to deliver talks on how to incorporate the digital dentistry workflow into daily practice to enhance efficiencies of dental work.
Some world’s top-notch dental experts shared valuable clinical techniques and dental specialties in the forums and hands-on workshops. More than one hundred booths showcased cutting-edge technologies, innovative products and services of dentistry. With these informative scientific programmes and trade exhibition, our signature event, held from 2 and 4 August 2019, attracted thousands of dental professionals and visitors from all around the world to take part.

HKIDEAS has successfully provided a platform for the dental and health practitioners, educators, researchers, dental product manufacturers and enterprises to boost dental knowledge and information interflow. Our success relied on all of the speakers, sponsors, exhibitors, participants and, last but not least, the Organizing Committee of the HKIDEAS 2019!
